PROFESSIONAL PROFILE

Currently studying BBA in AI at Nexford University, an IT tech & business professional with experience in Information Technology and software development. Immerse yourself in web and software development with JavaScript, React, Python, Django, and APIs, and get a little look at data engineering, artificial intelligence and product development. I have a technical and business and innovation orientation, working in a way that involves technical problem solving and the creation of usable, practical digital solutions. Community applications, Agricultural Management Systems, Inclusive Speech technology and enterprise software solutions are among the various applications I have been working with. My specific interests lie in front-end development, WordPress, web technologies and development of value added digital experiences for users and organisations.

TECHNICAL SKILLS

Frontend & Web: HTML, CSS, JavaScript, TypeScript, React, React Native, Node.js
Backend: Python, Django, FastAPI
Databases & Data: PostgreSQL, Data Analytics, Data Engineering
AI & Technology: Artificial Intelligence, Machine Learning, Speech Technology
Development Tools: Git, GitHub, GitHub Branches & Pull Requests
Professional: Product Development, Customer Development, Research, Documentation, Communication

PROJECT EXPERIENCE

TUWAYE AI | Team Member
Inclusive Speech Technology Startup | MIIC Startup Hatch 1.0

- **Situation:** People with speech and communication difficulties can face barriers when accessing communication and therapy support.
- **Task:** Contributed to a technology solution designed to make speech support more accessible through AI and digital tools.
- **Action:** Worked as part of the Tuwaye AI team on an inclusive speech-technology solution incorporating speech recognition and analysis, multilingual support, personalised exercises, and remote caregiver monitoring.
- **Result:** Contributed to the development of a social-impact technology project that progressed into **MIIC Startup Hatch 1.0**, including participation in product, customer, market development and validation activities.

KAMPULSE – URBAN LIFE IN KAMPALA
Open Data Ensemble / Formulus Community Days

- **Situation:** Community information can be difficult to organize and present in an accessible digital format.
- **Task:** Contributed to a community-focused application addressing urban life and information in Kampala.
- **Action:** Built and worked on the application using **React and Node.js**, while collaborating through GitHub branches and pull requests.
- **Result:** Contributed to a functional community application while gaining practical experience in frontend development, collaborative Git workflows and open-data technology.

KARIBU HARVEST MANAGER

- **Situation:** Agricultural operations require organized management of information and activities.
- **Task:** Developed a digital management solution for agricultural operations.

- **Action:** Built a **Django-based agricultural management dashboard** to support the organization and management of agricultural information.
- **Result:** Strengthened practical experience in backend development, dashboards and building software around real-world operational needs.

GROCERY POS SYSTEM | Refactory Academy

- **Situation:** Retail businesses need reliable systems for managing inventory and transactions.
- **Task:** Develop a point-of-sale solution for grocery operations.
- **Action:** Built a POS system supporting **inventory, transactions and receipts** as part of software engineering training at Refactory Academy.
- **Result:** Gained practical experience translating a business process into a working software solution.

SHEBANK

- **Situation:** SACCOs require accessible ways to register and manage savings while interacting with formal financial institutions.
- **Task:** Contribute to a technology solution connecting SACCO operations with formal banking institutions.
- **Action:** Worked on a hackathon platform that enables SACCOs to register and save funds securely with official banking institutions.
- **Result:** Developed experience in applying technology to financial inclusion and business problems.

PROFESSIONAL EXPERIENCE

ADMINISTRATIVE ASSISTANT

SCECK Consult | 2024 – Present

- Support day-to-day administrative and office operations through email and calendar management, scheduling, data entry, research and documentation.
- Use **Microsoft Office and Google Workspace** to organize information, coordinate activities and support efficient workflows.
- Apply strong attention to detail, communication and organization when handling administrative tasks and supporting team operations.

TALENT

Groundbreaker Talents

- Participate in professional development focused on **AI, software engineering, data engineering, entrepreneurship and leadership**.
- Apply technical learning through practical projects, community activities and innovation programs.
- Recognized as **Talent of the Month for August**, demonstrating active participation and contribution within the program.

EDUCATION

- **BBA in AI**

Nexford University | Ongoing

Focus areas include business, finance, artificial intelligence and data-informed decision making.

- **Associate of Applied Science in Business**

Nexford University

Completed coursework on the BBA pathway.

- **Diploma in Information Technology for Science**

Uganda Institute of Information and Communication Technology (UICT)

Developed a foundation in information technology and software development, including work on an **Electronic NID Registration System**.

Secondary Education
St Kizito SS Bugolobi
O-Level and A-Level | ICT

CERTIFICATIONS & PROFESSIONAL PROGRAMS

- Software Engineering with Python — Refactory Academy
- Data Engineering and Analytics — Refactory Academy
- Software & AI Engineering Program — Turing College
- Virtual Assistance — Maarifasasa

LEADERSHIP & COMMUNITY EXPERIENCE

- General Secretary — Electoral Commission, UICT
- General Secretary — UNAU Chapter, UICT
- General Secretary — IEEE, UICT
- Class Representative — UICT
- Member — Technology Innovation Students Association, UICT
- General Secretary — Students' Body, St Kizito SS Bugolobi
- Host — NASA Space Apps Challenge Uganda
- Participant — GirlCode Hackathon
- Participant — SheCode
- Participant — Open Data Ensemble Community Days
- Talent of the Month — Groundbreaker Talents, August

CAREER INTERESTS

Frontend Development | WordPress | Web Development | Software Engineering | AI | Data | Digital Innovation | FinTech | Business Technology | Product Development
